

STANDING SEAM METAL ROOF VENTILATION SYSTEM

Snap-Z

Optimize your ventilation for maximum benefits in both the warm and cold seasons. Proper roof ventilation is important for every climate in the United States.

Cold Climate

- Prevent ice dams
- Remove warm air that rises from conditioned space

Mixed Climate

- Prevent ice dams in the winter
- Remove moisture in the summer
- Save \$\$ on heating and cooling bill

Warm Climate

- Remove warm solar-heated air
- Remove moisture
- Reduce cooling costs

Snap-V™ vents are quick and easy to install, saving you time and money!

1. Position and fasten the Snap-Z vent to metal roofing
2. Snap the ridge cap onto the Snap-V™ vent. Fasten the ridge cap
3. You're done!

Product Specs
